1. Applicant is requested to amend page 1 of the specification to include the continuation data, i.e., citing corresponding parent application information.

Non-Art Rejections:

2. 35 U.S.C. § 101 reads as follows:
Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title".

3. Claim 23 is rejected under 35 U.S.C. § 101 because the claimed invention is directed to nonstatutory subject matter.

The "system" claim is not to a process, machine, manufacture or composition of matter. The claimed element's "module for providing a list", "module for processing the list", "module for transmitting the list", and "module for adjusting the list" are non-structural limitations, and in light of the specification these are disclosed as being purely software (see page 16, lines 16-26). Therefore, the claimed subject matter as a whole fails to fall within the definition of a process, machine, manufacture or composition of matter, patentable eligible category subject matter.

The claim may be amended by adding specific structural hardware elements, i.e., memory, processor.

Allowable Subject Matter:

4. Claims 1-11, 13-20 and 22 are allowed over prior art of record.
